## ABOUT US

Seed Co is a leading certified seed company operating in over 15 African countries, authorized to market varieties developed through its own research.

Seed Co breeds, multiplies, and distributes high-performance hybrid seed for maize, wheat, soyabeans, sugar beans, sorghum, and Sunflower

## OUR MISSION

We breed seed, feed and lead in Africa

The African Seed Company

## SEED CO WHEAT VARIETIES

Executive Genetics for  
Premium Wheat

## SC W9101

- **Yield potential:** ± 8t/ha
- **Maturity period:** Medium – Late (145 – 150 days)
- **Disease resistance:** Good resistance to Leaf rust
- **Milling & Baking Qualities:** Excellent (>12.9% Protein content; >29.1% Wet Gluten; 349 seconds Falling Number)
- **Grain Colour:** White
- **Adaptation:** All wheat growing areas

## SC SERENA

- **Yield potential:** ± 10.3t/ha
- **Maturity period:** Medium – Late (145 – 150 days)
- **Disease resistance:** Good resistance to Leaf rust
- **Milling and Baking Qualities:** Good (>11.7% Protein content; >27.7% Wet Gluten; 275 seconds Falling Number)
- **Grain Colour:** White
- **Adaptation:** All wheat growing areas

## SC SELECT

- **Yield potential:** ± 10.1t/ha
- **Maturity period:** Early – Medium (135 -140 days)
- **Disease resistance:** Good resistance to Leaf rust
- **Milling and Baking Qualities:** Excellent (>12.8% Protein Content; >30.9% Wet Gluten; 314 seconds Falling Number)
- **Grain Colour:** White
- **Adaptation:** All wheat growing areas

## SC W9104

- **Yield potential:** ± 10.5t/ha
- **Maturity period:** Medium – Late (145 – 150 days)
- **Disease resistance:** Good resistance to Yellow and Leaf rust
- **Milling and Baking Quality:** Very Good, consistently white flour colour ( $\geq$  13% Protein Content; > 28% Wet Gluten; > 390 seconds Falling Number)
- **Grain Colour:** Red
- **Adaptation:** All wheat growing areas

## SC NDUNA

- **Yield potential:** ± 10t/ha
- **Maturity period:** Early – Medium (135 – 140 days)
- **Disease resistance:** Moderate to Leaf rust
- **Milling and Baking Qualities:** Very Good consistently ( $>$ 12.1% Protein Content;  $\geq$  27.2% Wet Gluten Content; > 280 seconds Falling Number)
- **Grain Colour:** White
- **Adaptation:** All wheat growing areas

## PLANTING GUIDE

Prepare the land: Plough and level the field for good seed-soil contact.

Seed rate: Sow 120–140 kg/ha

Sowing depth: Plant seeds at 2–5 cm deep

Row spacing: Maintain 20–30 cm between rows.

Care & management: Apply fertilizer, control weeds, and monitor for pests and diseases.
